

Build this panoramic Octagon/Round kit home package by yourself and several of your friends. The Octagon or the Round home structure is an inexpensive & energy efficient design, yet allows you to have a full 270 degree view to the outside from the center of the house. This circular kit home is a do-it-yourself kit that can easily be assembled by three people in a few days with ordinary hand & power tools. This circular design home will save you up to 50% of the building costs over a conventional home & yet, will exceed the local building codes by far. Our polygon designs also save you up to 50% on heating and cooling costs.

This offer is for a 36' diameter model octagon/round pre-fab kit home package.

Our Package includes: Color coded heavy duty steel connectors, pre-cut & pre-drilled 3.5X12 L.V.L. hip-rafters, 2X12 SPF kiln-dried or pressure treated rafters, SPF or p.t. 2X6 pre-cut studs, SPF or p.t. 2X10/12 headers, 8X8 pre-cut & pre-drilled corner posts, machine bolts, nuts & washers, nails, set of blue prints, certified structural engineering drawings & calculations; assembly instructions & a basic construction handbook.

Also, this package contains all materials for constructing the exterior shell structure of our octagon or round home. This way, if you choose to build the structure out of pressure treated lumber, you can leave it un-finished for years as the structure will not rot or become insect infected ever (roof sheathing & floor system including decking B.O.). Buyer must supply lot, foundation, windows, doors, wiring, heating, plumbing, insulation, roofing and finishing materials to complete the job.

Save thousands over the price of a new kit! Only \$29.990 .-

CBI will load Purchaser' container & will help with shipping arrangements. Kit must be paid in full prior to release for shipment.
