A-Frame Series

A contemporary delight for beach-goers and mountain lovers alike. This simple, well-thought-out design will suit even the most discriminating taste.

Enter this home through two seven foot high sliding glass doors of the front deck. The first floor combines the living/dining/den area, all with a view to the out-of-doors. Even the kitchen set to the back of the house has an unhindered scenic view. A large storage room, bedroom and full bath complete the main floor.

Now climb the loft ladder to a hide-away upstairs with a view all its own. Such a large Loft area can accommodate more than just one person or it can offer the sought-after privacy one sometimes needs to stay happy.
